

Chemical Mixing Equipment

This equipment is used for combining chemical substances. It facilitates thorough and consistent blending in various chemical processes.

Product Overview

Educational Magnetic Construction Set

This magnetic construction set is designed to foster creativity and spatial reasoning skills through hands-on play. Featuring a collection of magnetic sticks and steel balls, it allows users to build a wide variety of geometric shapes and complex structures. The set is ideal for educational environments or as a developmental toy, offering an engaging way to explore structural engineering concepts.
