

Chemical Tanker with Stainless Steel Cargo Hold

This chemical tanker features a duplex stainless steel plate cargo hold. It is easy to clean and maintain, with short replacement times.

Product Overview

High-Efficiency Stainless Steel Chemical Transport

This stainless steel chemical tanker is engineered for the safe and reliable transport of diverse chemical substances. Utilizing high-grade duplex stainless steel, the cargo holds offer exceptional durability, easy cleaning, and fast turnaround times. The design focuses on operational longevity with minimal maintenance requirements, ensuring a low total cost of ownership over the vessel's lifecycle.
