

# Child Car Seat Occupancy Alert System

This system alerts caregivers if a child is left unattended in a car seat. It includes a pressure-sensitive pad, a car charger, and a receiver unit to provide timely warnings.

## ADDITIONAL IMAGES

## Product Overview

### Safety & Monitoring

This child car seat occupancy alert system is engineered to provide critical safety monitoring for caregivers. By utilizing a pressure-sensitive pad, the system detects the presence of a child in a car seat and transmits wireless alerts to a connected device. This technology serves as an essential preventative measure against the dangers of leaving a child unattended in a vehicle.

## Technical Specifications

Power Source	12V Vehicle Outlet
Connectivity	Wireless
Detection Method	Pressure-sensitive pad

## Kit Components

### Included Components

- Pressure-sensitive pad
- Car charger adapter
- Magnetic mounting plate
- Receiver unit

Charger Features	USB Port, 12V Compatible, Black and silver finish
