

Children's Bicycle with Training Wheels

This children's bicycle features a durable frame and includes training wheels for stability. It is also equipped with fenders and a rear rack.

Product Overview

Designed for Young Riders

This children's bicycle is engineered for stability and comfort, making it an ideal choice for beginners learning to ride. It features a durable frame equipped with removable training wheels to support early development. With practical additions like fenders, a rear rack, and knobby tires, this bike is built to handle both paved paths and light off-road exploration.
