

Children's Safety Test Kit

This kit is designed to assess product safety for children. It allows for the inspection of potential hazards, ensuring compliance with safety standards.

Product Overview

Children's Safety Test Kit

This test kit is engineered to assess the anti-electric shock and security performance of electrical annexes, plugs, and sockets. Designed in strict accordance with EN71 and IEC61032 standards, it ensures household electrical appliances are safe for children. The kit includes specialized probes to simulate fingers for different age groups, providing reliable safety verification.

Technical Specifications

Included Test Probes

- CX-18: Children's finger simulation (36 months or under)
- CX-19: Children's finger simulation (36 months to 14 years old)

Compliance Standards

EN71, IEC61032

Application

Primary Applications

- Anti-electric shock performance testing
- Security performance of plugs and sockets
- Household electrical appliance safety verification
