

Children's Step-Through Bicycle with Training Wheels

This is a children's bicycle with a step-through frame, ideal for young riders. It comes equipped with training wheels to aid in learning balance and coordination.

Product Overview

Designed for Young Learners

This children's step-through bicycle is specifically engineered to support young riders as they develop their cycling skills. Featuring a low-profile frame for easy mounting and dismounting, it provides confidence and stability for beginners. The inclusion of durable training wheels ensures a safe learning experience, while the dual-brake system introduces essential safety habits early on.
