

Chloroprene Rubber Motorcycle Drive Belt

This motorcycle drive belt is constructed from chloroprene rubber and reinforced with gummin. It is designed for optimal power transmission and resistance to wear and tear.

Product Overview

High-Performance Drive Belt

This motorcycle drive belt is engineered using high-quality chloroprene rubber and reinforced with gumming polyester for superior durability. Utilizing advanced manufacturing techniques, it delivers consistent tensile force and reliable power transmission. Designed for demanding conditions, this belt ensures smooth operation and long-lasting performance for various motorcycle applications.

Technical Specifications

Performance Features

- Steady tensile force
- Steady drive transmission
- High power capacity
- Enhanced durability

Material Composition

Chloroprene Rubber, Gumming Polyester
