

Chopstick Sterilization Unit with UV Light

This countertop unit uses UV light to sterilize chopsticks. Its compact design makes it suitable for kitchen counters.

Product Overview

Compact UV Sterilization Solution

This countertop sterilization unit provides an efficient way to dry and sanitize kitchen utensils, including chopsticks, knives, and forks. Designed with a small footprint to save valuable kitchen space, it utilizes UV light technology to ensure hygiene. The unit features an intuitive On/Off switch, automatic power-off functionality, and a dustproof design for safe, daily use.
