

Chrome Communication Antenna with Spring Coil

This communication antenna is finished in chrome and features a spring coil design. It is constructed with a slender, vertical rod and a stable, dark-colored base.

Product Overview

High-Performance Communication Antenna

This chrome-finished communication antenna is designed for reliable signal transmission in demanding environments. Featuring a durable spring coil mechanism, it offers enhanced flexibility and vibration resistance, making it suitable for mobile or stationary installations. The sleek chrome finish provides both a professional aesthetic and corrosion resistance for long-term outdoor use.

Physical Characteristics

Finish	Chrome
Design Features	Spring Coil, Vertical Rod, Spherical Base Element

Installation

Base Material	Rubber/Plastic Composite
Mounting Style	Circular Base
