

Chrome-Plated Brass Pipe Fitting with Male Threads

This fitting features male threads on both ends, separated by a hexagonal section. It is designed to connect pipes or fittings of different sizes or to extend a pipe run.

Product Overview

Premium Chrome-Plated Brass Fitting

This chrome-plated brass fitting is engineered for reliable, leak-proof connections in demanding plumbing applications. Featuring precision-machined male threads on both ends and a robust hexagonal mid-section, it allows for easy installation and tightening with standard wrenches. The durable brass construction, enhanced with a chrome finish, provides excellent corrosion resistance and long-term performance.

Technical Specifications

Material	Brass with Chrome Plating
Connection Type	Male Threaded
Design Features	Hexagonal Wrench Section, Corrosion Resistant, Precision Machined

Application

Key Benefits

- Secure, leak-proof sealing
- High durability against corrosion
- Easy installation with standard tools

Primary Application	Plumbing systems, pipe extensions, and fitting connections
