

Chrome Plated Hydronic Towel Radiator

This hydronic towel radiator features chrome plating and is designed to EN442 standards. It is designed for heating towels in bathrooms by connecting to a central heating system.

Product Overview

Premium Hydronic Towel Radiator

This hydronic towel radiator is engineered for efficient heating in bathrooms and similar environments, utilizing a central heating system to provide consistent warmth. Featuring a high-quality chrome plating, the unit offers a durable, corrosion-resistant finish that is both aesthetically pleasing and easy to maintain. The design incorporates multiple horizontal bars, ensuring optimal heat distribution and convenient towel drying capabilities.
