

Chrome-Plated Socket Extension Bar

This chrome-plated socket extension bar increases leverage and access in confined spaces. It is made from durable alloy steel and features a detent ball for secure socket retention.

Product Overview

Professional Grade Extension Bar

This chrome-plated socket extension bar is engineered for high-strength performance and durability in demanding work environments. Designed with a through-hole near the socket end, it provides enhanced leverage and accessibility in confined spaces. Built from high-quality alloy steel, this tool is an essential addition for professionals using ratchets and impact wrenches.
