

Chrome Plated Wheel Nut with Integrated Washer

Chrome plated wheel nuts designed for secure wheel attachment. It features a durable construction with integrated washer for even load distribution.

Product Overview

High-Durability Wheel Nut

This chrome-plated wheel nut is engineered for reliable and secure wheel attachment in professional automotive applications. It features an integrated washer design, which ensures even load distribution across the wheel surface to enhance safety and performance. Built for precision and durability, this component is suitable for various industrial and transport vehicle setups.

Technical Specifications

Hex Size	21 mm
Thread Size	12x1.5
Overall Length	36.5 mm
Finish	Chrome Plated

Features

Key Design Elements

- Integrated washer for load distribution
- Durable construction
- Corrosion-resistant chrome plating
