

Chrome Vanadium Steel Locking Wrench

This locking wrench is designed for secure gripping and clamping. It features adjustable clamping force with a knurled screw for precise control.

Product Overview

Professional Grade Locking Wrench

This high-quality locking wrench is engineered for secure gripping and clamping tasks in demanding environments. Constructed from durable chrome vanadium steel, it ensures long-lasting performance and reliability. It features hardened jaws with serrated edges for superior holding power and an adjustable knurled screw for precise control over clamping force, making it an essential tool for automotive repair and metalworking.

Technical Specifications

Material	Chrome Vanadium Steel
Finish	Chromed
Jaw Characteristics	Hardened, Serrated Edges
Adjustment Type	Knurled screw for adjustable clamping force

Applications

Primary Applications

- Automotive repair
- Metalworking
- General maintenance
- DIY projects
