

Chrome Vanadium Steel Screwdriver with TPR Handle

This screwdriver features a chrome vanadium steel shaft for enhanced durability. The ergonomic handle is constructed from three-color TPR (Thermoplastic Rubber) providing a comfortable and secure grip.

Product Overview

Professional Performance and Comfort

This screwdriver is engineered with a high-quality chrome vanadium steel shaft, ensuring superior durability and resistance against corrosion during intense use. The ergonomic handle is crafted from high-grade three-color TPR material, providing a non-slip, comfortable grip for long-term professional applications. Precisely machined tips offer optimal fit and maximum torque transfer, making it an essential tool for both household repairs and demanding industrial tasks.

Technical Specifications

Blade Material	Chrome Vanadium Steel
Handle Material	Three-color TPR (Thermoplastic Rubber)
Blade Specification	SL5 x 100mm

Key Features

Key Attributes	Ergonomic Design, Corrosion Resistant, High Torque Transfer, Non-slip Grip
