

# Chrome Vanadium Steel Socket

This socket is made from chrome-vanadium steel and designed for use with ratchets and wrenches. The six-point (hex) internal design ensures a secure grip on fasteners.

## Product Overview

### Professional Chrome Vanadium Socket

This high-quality socket is engineered for professionals requiring reliable fastening tools in demanding environments. Manufactured from durable chrome vanadium and chrome molybdenum steel, it offers exceptional strength and resistance to wear. With versatile 6-point and 12-point configurations, it ensures a secure fit for critical maintenance and assembly tasks.

## Technical Specifications

|              |           |
|--------------|-----------|
| Drive Size   | 1/4 inch  |
| Point Design | 6pt, 12pt |

## Materials and Finish

### Finish

- Chrome Plated
- Satin Finish

|          |                                    |
|----------|------------------------------------|
| Material | Chrome Vanadium, Chrome Molybdenum |
|----------|------------------------------------|

## Standards and Certification

### International Standards

DIN • ASME • ISO • GB • VPA/GS
