

Cigar Storage Humidor with Digital Control

This built-in cigar humidor maintains ideal humidity and temperature for cigar storage. It features a temperature control system and wooden shelves for optimal preservation, with a glass door and digital display.

Product Overview

Premium Cigar Preservation

This professional-grade cigar humidor is engineered to provide the precise climate control required for optimal cigar storage. Featuring a compressor-based direct cooling system and digital monitoring, it ensures stable temperature and humidity levels to protect your collection. Its integrated design and sleek glass door make it an ideal choice for high-end residential or commercial cigar storage solutions.

Technical Specifications

Net Capacity	188 L
