

Cigarette Box Cellophane Overwrapping Machine

This machine is designed for high-speed wrapping of cigarette boxes and similar products using cellophane. It ensures a tight and secure cellophane wrap, enhancing product presentation and protection.

Overview

High-Efficiency Overwrapping Solution

This cellophane overwrapping machine is engineered to create precise 3D folding packages using BOPP film or PVC materials. It is a versatile solution widely utilized across industries including cosmetics, pharmaceuticals, food, and stationery. Designed for reliability and efficiency, the machine ensures a tight, professional wrap that enhances both product presentation and protection.

Applications

Suitable Industries

Cosmetics, Medicines, Food, CDs, Stationery, Daily Necessities
