

Circular Heating Element

This heating element features a layered circular design with a metallic mounting plate. It is suitable for various heating applications, providing efficient and uniform heat distribution.

Overview

High-Efficiency Circular Heating Element

This circular heating element is engineered for consistent and uniform heat distribution, making it an ideal solution for diverse industrial heating applications. Constructed with copper-clad aluminum wiring, the unit balances durability with thermal efficiency. Designed to accommodate a range of power requirements and physical dimensions, it offers flexible integration for various equipment setups.

Technical Specifications

Power Range

1.2 kW

Minimum Power

3 kW

Maximum Power

Diameter Range

Æ 160m - Æ 310m

Materials & Construction

Wire Material

Copper Clad Aluminum

Design Features

Design Type

Circular • Multi-layered
