

Circular Saw Blade

This precision-engineered circular saw blade is designed for cutting wood, metal, or plastic. It features a hardened steel body for durability and resistance to deformation.

Product Overview

Precision Circular Saw Blade

This precision-engineered circular saw blade is designed for versatile cutting applications across wood, metal, and plastic materials. Constructed with a hardened steel body, it offers superior durability and resistance to deformation during heavy-duty use. The teeth are precisely sharpened and set to ensure efficient material removal and clean, accurate cuts for professional woodworking and construction projects.

Technical Specifications

Primary Applications

- Professional Woodworking
- Metalworking
- Construction Projects

Body Material	Hardened Steel
Compatible Materials	Wood, Metal, Plastic
Mounting	Central arbor hole

Key Features

Performance Highlights

1 High

Deformation Resistance

1 High

Cut Precision
