

Circular Saw Blade for Material Cutting

This circular saw blade features sharp, pointed teeth for effective cutting. Designed for mounting on saws, it facilitates precise material processing.

Product Overview

Professional Material Cutting Blade

This high-performance circular saw blade is engineered for precision material cutting in industrial environments. Featuring sharp, durable teeth arranged for optimal material removal, it ensures clean and efficient cuts. The blade is constructed from robust metal with a machined finish, designed to withstand the rigors of heavy-duty use while maintaining structural integrity.

Technical Specifications

Application

Material Cutting • Industrial Use

Material Composition

Machined Metal

Design Features

Sharp Teeth, Machined Texture, Central Mounting Hole
