

Circular Saw Blade for Woodworking

These circular saw blades are designed for smooth crosscuts, rip cuts, and miter cuts in all types of wood. The blades are constructed from high-quality steel, hardened and tempered for long life and easily resharpened.

Product Overview

Professional Woodworking Circular Saw Blade

These high-quality circular saw blades are engineered for precision and durability in diverse woodworking applications. Designed to handle crosscuts, rip cuts, and miter cuts across all wood types, they operate effectively at moderate cutting speeds. Constructed from hardened and tempered high-quality steel, these blades offer an extended service life and are easily resharpened to maintain peak performance.

Technical Specifications

Maintenance

Easily resharpened

Material Composition

Hardened and tempered high-quality steel

Suitable Applications

Crosscuts, Rip cuts, Miter cuts

Customization

Available Customizations

- Arbor hole size
- Number of teeth
