

Circular Saw Blade for Woodworking

This circular saw blade is designed for cutting wood and other materials. It features durable teeth for efficient cutting and is constructed from high-quality steel for longevity.

Product Overview

Professional Woodworking Circular Saw Blade

This high-quality circular saw blade is engineered for precision and durability in various woodworking applications. Constructed from premium steel, it offers exceptional wear resistance and longevity for demanding work environments. Designed for versatility, it is suitable for ripping, cross-cutting, and miter cuts, ensuring clean and efficient performance.

Technical Specifications

Material	High-quality Steel
Compatible Applications	Ripping, Cross-cutting, Miter cuts
Mounting	Central arbor hole for secure fitment

Design Features

Performance Highlights

- Sharp, durable teeth for efficiency
- Wear-resistant steel construction
- Optimized for diverse wood cutting tasks
