Product Overview

Professional Circular Saw Blades

These circular saw blades are engineered for versatility across table saws, cut-off saws, and specialized cutting machinery. Designed to accommodate various material types and thicknesses, they ensure optimal cutting speed and precision. Whether you are focused on rough cuts or fine finishing, these blades provide the reliability required for demanding woodworking and construction environments.

Technical Specifications

Tooth Configuration

ATB • Alternating Top Bevel

Tooth Geometry

Angle Type	Degree
Side View Horizontal	15
Side View Vertical	15
Front View Bevel	10

Features

Key Features

- Hardened steel body for enhanced durability
- Precision-ground teeth for smooth cutting performance
- Expansion slots to minimize vibration and noise

Application

Compatible Equipment

Table Saws, Cut-off Saws, Portable Circular Saws, Specialized Cutting Machines
