

# Circular Saw Blades and Abrasive Cutting Wheels

Circular saw blades and abrasive cutting wheels are designed for power tools. The saw blades cut wood, while the cutting wheels handle metal and hard materials.

## Product Overview

### Professional Cutting Solutions

This high-performance collection features professional-grade circular saw blades and abrasive cutting wheels tailored for diverse construction and fabrication needs. Designed for durability and precision, these accessories offer reliable performance in both woodworking and metalworking applications. Built to withstand high operational demands, they are essential tools for achieving efficient and accurate cuts in demanding environments.

## Circular Saw Blades

### Wood Cutting Blade Performance

**184 mm**

Diameter

**24 T**

Tooth Count

**7000 RPM**

Max Speed

**15.875 mm**

Arbor Size

## Abrasive Cutting Wheels

### Metal Cutting Wheel Performance

**178 mm**

Diameter

**1.6 mm**

Thickness

**8500 RPM**

Max Speed

**22.2 mm**

Arbor Size

## Materials and Applications

Primary Applications

Woodworking, Metalworking, Construction, Fabrication

Material Composition

Alloy Steel
