

Circular Soap Bar Wrapping Machine

This specialized machine is designed for efficiently wrapping circular soap bars in high-volume production settings. It features a vertical feeding mechanism, a rotating platform, and a wrapping and sealing unit, all enclosed for safety and dust protection.

Product Overview

High-Efficiency Soap Packaging

The XYB80 is a specialized packaging machine engineered specifically for circular soap bars. Featuring a robust mechanical construction, it incorporates a vertical cylindrical feeding system and a rotating platform to ensure consistent wrapping and sealing. This high-volume solution is housed within a protective cabinet, making it an ideal choice for professional production lines requiring speed and reliability.

Technical Specifications

Key Mechanisms

- Vertical cylindrical feeding mechanism
- Rotating soap placement platform
- Integrated wrapping and sealing unit

Model Identifier	XYB80
Equipment Type	Circular Soap Wrapping Machine

Design and Safety

Safety and Protection

Dust protection enclosure • Industrial grade safety

Construction	Robust mechanical, High-volume capacity, Enclosed cabinet
