

Circular Speaker Component

This is a circular speaker component designed for audio output. It features a blue suspension and mounting tabs for installation in electronic devices.

Overview

High-Performance Circular Speaker Component

This circular speaker component is engineered for integration into monitors and compact electronic devices. Featuring a robust central cone and specialized blue suspension, it is designed to deliver consistent audio performance. The unit includes a durable black frame with integrated mounting tabs for simplified installation.

Physical Characteristics

Suspension Color

Blue Suspension

Form Factor

Circular

Mounting Features

Yes

Frame Color

Black

Applications

Primary Applications

- Monitor Audio Systems
- Compact Electronic Devices
