

Circular Vented Plastic Tray

This circular, dark gray plastic tray is designed with concentric oval-shaped ridges and perforations. It features a recessed rectangular section in the center, likely purposed for drainage or ventilation within electronic setups.

Product Overview

Circular Vented Plastic Tray

This circular, dark gray plastic tray is engineered for specialized applications requiring efficient airflow and drainage. Featuring a series of concentric oval-shaped ridges and integrated perforations, it is designed to support electronic equipment or components effectively. The inclusion of a recessed rectangular center provides stability, making it an ideal base or stand solution for various technical setups.

Design and Construction

Color	Dark Gray
Form Factor	Circular
Key Features	Vented Design, Concentric Ridges, Drainage Perforations, Recessed Center

Application

Common Use Cases

- Electronic equipment support
- Component base
- Monitor stand base
- Ventilation-critical setups
