

Circulation and Filtration Water Pump

This water pump is engineered for efficient water circulation and filtration. It is suitable for use in swimming pools, spas, and water features.

Product Overview

High-Performance Circulation Pump

This single-stage centrifugal pump is designed for efficient water circulation and filtration in swimming pools, spas, and water features. Built with high-quality, corrosion-resistant materials including a glass-loaded polypropylene body and Noryl impeller, it ensures long-lasting reliability. The unit features an IP55 protection rating and Class F insulation, making it ideal for continuous, quiet operation in demanding environments.

Technical Specifications

Protection Rating

IP 55

Motor Type

Asynchronous, two poles

Insulation Class

Class F

Thermal Protection

Yes

Construction Materials

Key Components

Component	Material
Pump Body/Diffuser	Glass loaded polypropylene
Impeller	Noryl
Seal Mounting	Glass loaded polyamide
Motor Shaft	Stainless steel AISI 420
Mechanical Seal	Graphite and steatite
Motor Housing	Aluminium L-2521

Features

Key Features

Quiet Running, Continuous Operation, Integrated Prefilter, Epoxy Resin Windings
