

# Citroen XM Left Information Display Flex Cable

Flexible printed circuit board (FPC) designed for the left information display of a Citroen XM vehicle. This flex cable connects the display to the main system, transmitting data and power.

## Product Overview

### Flexible Display Connector

This flexible printed circuit board (FPC) is specifically engineered for the left information display module. It ensures reliable data and power transmission between the display and the vehicle's main system. Designed for durability, the cable features high signal integrity and is built to withstand the environmental conditions inside a vehicle dashboard.

## Ordering Information

Minimum Order Quantity	10 pieces
------------------------	-----------

## Technical Details

Component Type	Flexible Printed Circuit (FPC)
Key Features	High Signal Integrity, Environmental Resistance, Precise Dimensional Accuracy
