

# Citrus Juicer with Pulp Control

This citrus juicer is designed for extracting fresh juice from citrus fruits. It features a universal reamer suitable for lemons, limes, oranges, and grapefruits, along with a pulp control system.

## Product Overview

The JE-629 Citrus Juicer features a compact design with a universal reamer and transparent container.

## Efficient Citrus Extraction

The JE-629 Citrus Juicer is a compact and efficient kitchen appliance designed for extracting fresh juice from various citrus fruits, including lemons, limes, oranges, and grapefruits. It features a versatile two-direction twist mechanism and an integrated pulp control system, allowing users to customize the texture of their juice. With dishwasher-safe components, an anti-drop function, and convenient cord storage, this unit is engineered for both performance and ease of use in any modern kitchen.
