

City Bus for Urban Transportation

This city bus is designed for urban transportation. It features two doors, one at the front and one in the middle, and multiple rows of seats.

Overview

Urban Transit Solution

This city bus is engineered specifically for efficient urban transportation, balancing passenger comfort with operational reliability. Featuring a distinctive white and green exterior with a blue roof, the design is optimized for high-visibility and modern city aesthetics. The layout includes two strategic entry points—front and middle—to facilitate rapid passenger boarding and alighting in busy transit environments.
