

CL Single Hole Copper Tube Terminal

CL single hole type tube terminals are designed for connecting copper conductors in power cables to electronic equipment. They are made of 99.99% pure copper and feature surface acid-washing.

Product Overview

High-Performance Copper Tube Terminals

These single-hole tube terminals are engineered for reliable electrical connections in power cable systems. Manufactured from 99.99% pure T2 copper, they provide excellent electrical conductivity and durability. Designed to handle a wide range of conductor sections, these terminals are suitable for demanding applications in electrical cabinets, transformers, railway, communication, and renewable energy sectors.

Technical Specifications

Material	99.99% Pure T2 Copper
Conductor Section Range	1.5 - 500 mm ²
Operating Temperature	-55°C to 150°C
Surface Treatment	Acid-washing

Compliance & Standards

Certifications	ISO9001, ROHS, CE, UL, IATF16949
----------------	----------------------------------

Applications

Suitable Industries

- Electrical Cabinets
- Transformers
- Wiring Harness Manufacture
- Railway
- Communication
- Ship Industry
- Aircraft
- PV (Photovoltaics)
- Wind Power
