Overview

Professional Installation Tool Set

This manual operated tool set is specifically designed for the precise installation of mechanical lugs and connectors in electrical power transmission and distribution. The kit combines a high-strength clamp holder with a versatile ratchet and socket set to ensure secure and reliable connections. It is an essential solution for electrical maintenance and installation tasks requiring manual control and high leverage.

Product Components

Package Contents

- Clamp Holder (Model: AZGJ-1050)
- Ratchet (Model: JLBS-380)
- 1 Set of 7 Sockets

Technical Specifications

Type	Length(mm)	Package Weight (kg)	Pack(pcs)
AZGJ-1050	420	2	1x4
JLBS-380	380		

Dimensional data and packaging specifications for the AZGJ-1050 and JLBS-380 components.

Component Dimensions

Component	Model	Length (mm)
Clamp Holder	AZGJ-1050	420
Ratchet	JLBS-380	380

Socket Sizes Included

9mm • 10mm • 13mm • 17mm • 19mm • 22mm • 24mm

Logistics & Packaging

Package Weight	2 kg
Pack Configuration	1x4 pcs

Application

Operation Mode

1 Type

Manual Operated

Primary Application	Installation of mechanical lugs and connectors
Industry Use	Electric Power, Transmission & Distribution, Electrical Maintenance
