

Clamp-On Bicycle Front Derailleur

This bicycle front derailleur shifts the chain between different chainrings. It is a clamp-on style, designed to attach to the frame's seat tube and features a cage that guides the chain during shifting.

Product Overview

Precision Shifting Performance

This clamp-on bicycle front derailleur is engineered for reliable chain management across multi-speed drivetrains. Designed for secure attachment to the seat tube, it ensures smooth and consistent transitions between chainrings. Built with durable metal construction, this component is a robust solution for maintaining optimal gear ratios and shifting performance.

Technical Specifications

Adjustment Features

- Fine-tuning adjustment screws
- Integrated chain guide cage

Mounting Style	Clamp-on
Drivetrain Compatibility	Multi-speed
Construction Material	Metal, Durable
