

# Class 00 Electrical Insulation Gloves - Latex, 500V

These high-voltage insulating gloves are made of natural rubber latex. They provide protection against electrical shock and comply with EN 60903 and IEC 60903 standards.

## ADDITIONAL IMAGES

## Product Overview

### Professional Electrical Protection

These Class 00 electrical insulation gloves are crafted from high-quality natural latex, providing essential protection for professionals working with electrical systems. Designed with a contoured shape to minimize hand fatigue, they combine superior dielectric properties with necessary flexibility and durability. Each pair is individually numbered for full traceability and meets rigorous international safety standards for reliable performance in critical environments.

## Technical Specifications

### Max Use AC Voltage

**500 V**

Max Use Voltage

Proof Test AC Voltage	2500 V
Material	Natural Latex
Length	36 cm
Color	Orange

## Compliance & Safety

Standards	IEC 60903:2014, Class 00
Traceability	Yes

## Application Areas

### Suitable Applications

- Power generation
- Electrical contracting
- Hybrid automotive repair
- Hybrid automobile manufacturing
- Industrial plant maintenance
- Utilities

## Key Features

### Design Benefits

Contoured shape • Silicone free • Dielectric properties • Flexible • Durable
