

# Class D High Power Car Amplifier

This high-performance Class D amplifier is designed for high power applications. It features a compact design, efficient heat dissipation, and robust construction.

## Overview

### High-Performance Audio Amplification

This Class D high-power car amplifier is engineered for demanding audio applications where efficiency and performance are critical. Featuring a compact, robust design, it ensures reliable operation and excellent heat dissipation for sustained high-output performance. Designed to deliver clean, powerful sound with minimal distortion, it is an ideal solution for professional audio integration.

## Technical Specifications

### Amplifier Class

Class D

### Model Number

1J11000A

## Performance Features

### Performance Highlights

**1 High**

Efficiency

**0 Low**

Distortion

## Design & Construction

### Design Features

- Compact form factor
- Efficient heat dissipation system
- Robust construction
