

Classic Mobile Phone with Keypad

This mobile phone features both a touchscreen display and a physical alphanumeric keypad. The device is designed with a metallic finish and includes function buttons.

Product Overview

Classic Design Meets Modern Functionality

This classic mobile phone offers a reliable communication solution with a user-friendly physical alphanumeric keypad. Designed for durability and ease of use, it features a metallic finish that provides a professional look suitable for various business environments. The integration of a touchscreen display alongside tactile buttons ensures efficient navigation and operation for daily tasks.
