Product Overview

Professional Classroom Audio Solution

This classroom public address system is engineered to deliver clear, intelligible audio in educational environments ranging from standard classrooms to large lecture halls. Designed with advanced feedback suppression technology, it ensures speech clarity while minimizing unwanted noise. The system features flexible connectivity with multiple microphone inputs, individual gain controls, and phantom power support to accommodate various audio setups.

Technical Specifications

Model Number	HT-2901
Microphone Inputs	3
Key Audio Features	Feedback Suppression, Individual Gain Control, Phantom Power

Deployment & Usage

Environment Compatibility

Classroom • Lecture Hall • Indoor • Outdoor

Installation	Designed for easy installation and seamless integration with existing audio equipment.
Speaker Build	Durable, weather-resistant enclosure
