

Claw Hammer with Forged Steel Head and Wooden Handle

This claw hammer features a forged steel head and a wooden handle. It is suitable for construction, carpentry, home repairs, and DIY projects.

Product Overview

Professional Claw Hammer

This versatile claw hammer is engineered for durability and precision, featuring a robust forged steel head capable of handling demanding construction and carpentry tasks. The ergonomically designed wooden handle ensures a secure, comfortable grip, promoting optimal balance and control during repetitive use. Ideal for both professional trade applications and reliable home repair projects, this tool combines classic design with modern performance standards.
