

Claw Hammer with Wooden Handle

This claw hammer features a forged steel head for enhanced durability. Its wooden handle provides a comfortable grip and absorbs shock, making it suitable for driving and removing nails in carpentry, construction, and DIY projects.

Product Overview

Professional Claw Hammer

This claw hammer features a high-quality forged steel head designed for exceptional durability and impact resistance during heavy-duty tasks. The ergonomic wooden handle provides a comfortable, secure grip while offering natural shock absorption to reduce user fatigue. Perfectly balanced for driving and removing nails, this tool is an essential addition for professional carpentry, construction sites, and demanding DIY projects.
