

# Clay Pick with Fiberglass Handle

This clay pick is designed for digging and breaking up clay soil. It features a durable plastic-coated fiberglass handle and a hardened steel head.

## Product Overview

### Professional Grade Clay Pick

This clay pick is engineered for heavy-duty digging and breaking up compact clay soil. Featuring a robust hardened steel head, it delivers efficient performance and long-lasting durability for demanding tasks. The fiberglass handle is designed to provide exceptional strength while reducing overall tool weight, and the plastic coating ensures a comfortable, secure grip while protecting against wear and tear in harsh environments.

## Technical Specifications

### Key Benefits

- Hardened steel head for high impact resistance
- Fiberglass handle for reduced weight and increased strength
- Plastic-coated handle for improved grip and durability

Head Material	Hardened Steel
Handle Material	Fiberglass with Plastic Coating
Ideal Applications	Landscaping, Gardening, Construction, Clay Soil Excavation
