

Clean Water Submersible Pump

This clean-water submersible pump is extensively used for arable land irrigation and mine water drainage. Its compact construction, tight sealing, and energy-saving design ensure long-lasting durability.

Product Overview

Clean Water Submersible Pump

The EO-VXM series submersible pump is a versatile, high-efficiency solution designed for clean water applications, including agricultural irrigation, mine drainage, and flood control. Built with a focus on durability and energy conservation, this compact pump ensures reliable performance in demanding environments like rivers, lakes, and wells. Its high-quality sealing and robust materials make it an ideal choice for sustained, long-term industrial and civil use.

Performance Specifications

Operating Parameters

40 °C

Max Fluid Temperature

8 bar

Max Working Pressure

Suitable Fluid

Clean water

Electrical Specifications

Power Requirements

Single phase 220V±5%/50HZ

Safety Standards

IP88, Insulation Class B

Materials and Construction

Component Materials

Component	Material
Pump body	Aluminum
Motor body	Aluminum
Impeller	Rubber
Shaft	450# steel
