

# Clean Water Submersible Pump with Plastic Housing

This submersible pump is designed for clean water applications. It is ideal for urban well water pumping, field irrigation, garden irrigation, household water supply, and drainage of accumulated industrial water.

## Overview

### Clean Water Submersible Pump

This submersible pump is engineered for efficient clean water management in various environments. Featuring a durable plastic housing, it is designed for corrosion resistance and easy portability. It is an ideal solution for urban well water pumping, field and garden irrigation, household water supply, and construction drainage.

## Performance Metrics

### Key Performance Metrics

**5 m**

Max Immersion Depth

**40 °C**

Max Liquid Temp

Liquid PH Range

6.5-8

## Technical Specifications

### Motor Features

- Copper winding
- Built-in thermal protector
- Stainless steel welded shaft

Insulation Class

F

Protection Class

IPX8

## Certifications

Certifications & Standards

CCC, ISO 9001, GS, CE, RoHS

## Applications

### Typical Applications

- Urban well water pumping
- Field irrigation and drainage
- Garden irrigation
- Household water supply
- Industrial accumulated water drainage
- Construction water supply/drainage
- Livestock breeding
