

Cleaning Machine Pad

These are replacement pads for cleaning machines. The pads have a textured, absorbent side and a smoother, possibly non-abrasive side.

Product Overview

Professional Cleaning Pads

These round cleaning pads are engineered for high-performance use with industrial cleaning machines. Designed for versatility, they are suitable for scrubbing, polishing, and buffing a wide variety of commercial surfaces. Featuring a dual-sided construction with a textured, absorbent side and a smoother, non-abrasive backing, these pads deliver consistent results for professional maintenance tasks.
