

Clear Plastic Washer Pump for Agricultural Machinery

This washer pump is designed for agricultural machinery, especially drainage and irrigation systems. Its clear plastic body allows visual inspection of the internal components and fluid flow.

Product Overview

High-Quality Agricultural Washer Pump

This clear plastic washer pump is specifically engineered for use in demanding agricultural machinery environments, including drainage and irrigation systems. Its transparent design facilitates easy visual inspection of internal components and fluid flow to ensure reliable operation. Featuring a robust cylindrical body and integrated metal electrical connectors, this component is designed for durability and ease of maintenance in professional settings.

Technical Specifications

Construction Features

- Transparent body for fluid flow monitoring
- Integrated metal connector for electrical connectivity
- Multi-section cylindrical design
- Universal inlet/outlet configuration

Material

Clear Plastic

Application

Agricultural Machinery, Drainage Systems, Irrigation Systems
