

# Clevis Slip Hook with Latch

Clevis slip hooks facilitate easy chain connection. They feature a latch for secure load handling and come in self-colored or zinc-plated finishes for corrosion resistance.

## Product Overview

### Clevis Slip Hook with Latch

The Clevis Slip Hook with Latch is a versatile rigging component designed for reliable chain connection and secure load handling. Featuring an integrated latch mechanism, it ensures safety during lifting operations by preventing accidental disengagement. These hooks are available in either self-colored or zinc-plated finishes, providing options for different environmental needs and corrosion resistance.

## Technical Specifications

### Key Features

- Integrated safety latch
- Clevis design for easy chain attachment
- Corrosion-resistant finish options

### Available Finishes

Self-colored, Zinc-plated

## Application

### Primary Applications

Lifting • Rigging
