

Close-Coupled Centrifugal Pump

This close-coupled centrifugal pump is designed for efficient fluid transfer in various applications. It features a stainless steel pump head and a robust electric motor for reliable performance and durability.

Product Overview

Close-Coupled Centrifugal Pump

The GZ(S) series close-coupled centrifugal pump is engineered for efficient fluid transfer across industrial, agricultural, and HVAC applications. Featuring a robust stainless steel construction, this pump ensures reliable performance and durability while minimizing installation space through its compact design. It is specifically optimized for transporting clean, non-aggressive media, delivering consistent flow rates and pressure with low maintenance requirements.

Technical Specifications

Key Features

- Close-coupled design for space efficiency
- Dynamically balanced impeller
- Leak-free mechanical seal
- Corrosion-resistant stainless steel pump head

Material Compatibility	SUS304, SUS316L
Suitable Media	Clean, non-aggressive fluids
Motor Type	TEFC (Totally Enclosed Fan Cooled)

Applications

Primary Applications

HVAC Systems • Industrial Processes • Water Supply • Agriculture
