

Close-Coupled Centrifugal Pump

This centrifugal pump increases pressure and flow rate of a fluid using a rotating impeller. The close-coupled design allows direct mounting to an electric motor.

Product Overview

High-Efficiency Centrifugal Pump

This close-coupled centrifugal pump is engineered for robust industrial performance, featuring a direct-mount design to an electric motor for optimal power transfer. Constructed with a durable casing and corrosion-resistant impeller materials, it ensures reliable operation in demanding environments. Designed for versatility, this unit is an excellent solution for water supply, agricultural irrigation, and general industrial fluid transfer applications.

Technical Specifications

Pump Type	Close-Coupled Centrifugal
Construction Materials	Cast Iron, Steel, Bronze, Stainless Steel
Mounting Style	Direct-coupled to electric motor

Applications

Typical Applications

- Water Supply
- Agricultural Irrigation
- Industrial Fluid Transfer

Design Features

Design Highlights

Sturdy Base Frame • Efficient Power Transfer • Corrosion Resistant
