Product Overview

High-Performance Cloth Dryer Motor

This universal electric motor is engineered specifically for cloth dryer applications, offering a robust and durable solution for appliance maintenance and repair. Featuring a high-quality metal housing and precision-engineered internal windings, it ensures efficient operation and long-lasting performance. The design includes an integrated pulley system for belt-driven setups and a standard multi-pin electrical connector, making it compatible with a wide range of dryer models.

Technical Specifications

Motor Type	Universal Electric Motor
Housing Material	Metal
Drive System	Belt-driven pulley system
Electrical Connection	Multi-pin connector

Features

Key Features	Robust Housing, Belt-Driven, Cooling Vents, Universal Compatibility
